

## Solution 1

```
KD1-86639-Prathamesh@>select * from orders where cnum=(select cnum from customers where cname='Cisneros');
+-----+-----+-----+-----+
| onum | amt   | odate   | cnum | snum |
+-----+-----+-----+-----+
| 3001 | 18.69 | 1990-10-03 | 2008 | 1007 |
| 3006 | 1098.16 | 1990-10-03 | 2008 | 1007 |
+-----+-----+-----+-----+
2 rows in set (0.00 sec)
```

## Solution 2

```
KD1-86639-Prathamesh@>select cname, rating from orders, customers where orders.amt > (select avg(amt) from orders) and customers.cnum=orders.cnum;
+-----+-----+
| cname | rating |
+-----+-----+
| Liu   | 200    |
| Clemens | 100    |
| Clemens | 100    |
+-----+-----+
3 rows in set (0.00 sec)
```

## Solution 3

```
KD1-86639-Prathamesh@>select sum(amt) from salespeople, orders where orders.snum=salespeople.snum group by salespeople.snum having sum(amt) > (select max(amt) from orders);
+-----+
| sum(amt) |
+-----+
| 15382.07 |
+-----+
1 row in set (0.00 sec)
```
